

Relocation Allowances

§ 302-7.17

Method of shipment	How weight of shipment is determined
(d) Constructive weight	If adequate scales are not available at origin, en route or at destination, a constructive weight based on 7 pounds per cubic foot of properly loaded van space may be used. Such weight may be used for a part-load when its weight could not be obtained, without first unloading it or other part-loads being carried in the same vehicle or when the HHG are not weighed because the carrier's charges for local or metropolitan area moves are properly computed on the basis other than weight or volume of the shipment (as when payment is based on an hourly rate and distance involved). In such instances a statement from the carrier showing the properly loaded van space required for the shipment should be obtained with respect to proof of entitlement to a commuted rate payment when net weight cannot be shown.

§ 302-7.13 What methods of transporting and paying for the movement of HHG, PBP&E and temporary storage are authorized?

There are two authorized methods of transporting and paying for the movement of HHG, PBP&E and temporary storage. Your agency will determine which of the following methods will be authorized.

(a) *Commuted rate system.* Under the commuted rate system you assume total responsibility for arranging and paying for, at least the following services: packing/unpacking, crating/uncrating, pickup/delivery, weighing, line-haul, drayage, and temporary storage of your HHG and PBP&E with a commercial HHG carrier or by renting self drive equipment for a do-it-yourself move. When any PBP&E is transported as an administrative expense of your agency, all arrangements (e.g., packing/unpacking, pickup/delivery, weighing, temporary storage, etc.) will be handled and paid for by your agency.

(b) *Actual expense method.* Under the actual expense method, your agency assumes the responsibility for arranging and paying for all aspects (e.g., packing/unpacking, pickup/delivery, weighing, line-haul, drayage, temporary storage, etc.), of transporting your HHG and PBP&E with a commercial HHG carrier.

§ 302-7.14 Are there any disadvantages to using the commuted rate method for transporting HHG, PBP&E and temporary storage?

Yes. The disadvantages to using the commuted rate method for transporting HHG, PBP&E and temporary storage are that the:

(a) Government cannot take advantage of any special rates that may be offered only to Government shipments;

(b) Commuted rate method does not apply to intrastate moves; and

(c) Commuted rate method may not fully reimburse your out-of-pocket expenses.

§ 302-7.15 Must I use the method selected by my agency for transporting my HHG, PBP&E and temporary storage?

No, you do not have to use the method selected (§ 302-7.301) by your agency, and you may pursue other methods, however, your reimbursement is limited to the actual cost incurred, not to exceed what the Government would have incurred under the commuted rate system within CONUS and the actual expense method OCONUS.

§ 302-7.16 Is the maximum weight allowance for HHG and temporary storage limited when quarters are furnished or partly furnished by the Government OCONUS or upon return to CONUS?

When quarters are furnished or partly furnished by the Government OCONUS, your agency may limit the weight of HHG and temporary storage that can be transported to that location. Only the authorized weight allowance that was shipped to the OCONUS location may be returned to CONUS upon completion of the tour of duty, unless the agency makes an exception under conditions specified in agency internal regulations.

§ 302-7.17 May PBP&E be transported at Government expense upon returning to CONUS for separation from Government service, after completion of an OCONUS assignment?

Any PBP&E that was transported as an administrative expense of the Government to the OCONUS assignment
